

# Hervey Bay State High School – YEAR 10 2024

Name: \_\_\_\_\_ Form: \_\_\_\_\_

Number:

(Office Use only)

## Core Subjects

Please be aware that in 2024, National Curriculum requirements state that all students must study English, Mathematics and Science. For this reason, students will be limited to three elective subjects.

- Number five (5) preferences for elective subjects. Every effort will be made to accommodate student's highest choices. Popularity of subjects will dictate whether there will be multiple classes of the same subject.
- Music: Students who have not participated in the Music program in Year 8 and/or 9 will need to meet with the music staff to audition/perform before acceptance into the class will occur
- Due to the nature of the STEM (Science, Technology, Engineering and Maths) curriculum, the STEM elective subject will be available to those students who have achieved a 'B' rating or better for their Mathematics and Science results in year 9.
- Students' academic performance in subjects during Year 9, may be used to determine whether a student will be placed in elective subjects (based on class numbers).

## Electives

Please number your preferences 1 – 5 (**across all subjects, not in each column**).

Subject	No.	Subject	No.
Agricultural Science		Geography	
Art		History	
Chinese		INTAD - Metalwork	
Dance		INTAD - Woodwork	
Digital Technologies		Marine Studies	
Drama		Music	
Business		Physical Education	
Cert I Hospitality		STEM	

Once a student has chosen their elective subjects, it is assumed that they will continue with these subjects for all of Year 10. This is to allow for the development of a deep level of knowledge and understanding of concepts studied in preparation for Year 11 and 12.

These electives will only be available if sufficient students are enrolled and staff/resources are available.
